Senior Software Engineer / Lead Software Engineer / Senior Software Architect

Innovative and results-driven Senior Software Engineer with over a decade of experience in software development, cloud architecture, and automation. Proven expertise in designing, developing, and deploying scalable, high-performance applications using .NET, C#, Azure, and microservices architectures.

Adept at leading development teams, managing software projects, and implementing automation strategies to streamline deployment workflows and improve operational efficiency. Strong background in cloud-native application development, distributed systems, and CI/CD pipelines, with hands-on experience across Windows and Linux environments.

Passionate about solving complex technical challenges, optimizing system performance, and leveraging emerging technologies to drive business innovation. A proactive mentor and collaborator, dedicated to fostering a culture of continuous learning, clean architecture, and software excellence.

WORK EXPERIENCE

Senior Software Engineer

11/2018 - 11/2024

ECI Software Solutions / Lojic, LLC

- Designed, developed, and deployed Azure cloud-native application solutions using Azure Function Apps, .NET Core, C#, Blazor WASM, Durable Functions, and PostgreSQL, resulting in a 40% reduction in manual workflows and 80% improvement in ERP data accuracy.
- Led requirements analysis and software design efforts, collaborating with cross-functional teams across engineering, QA, and product to deliver high-quality software on time, contributing to a 35% reduction in development cycle time and improved cross-team alignment.
- Mentored and provided technical guidance to junior engineers, leading to a 20% improvement in code quality (as measured by code reviews and defect rates) and reducing onboarding time by 30%, while fostering a culture of continuous learning and innovation.

Director of Applications and Automation / Senior Software Engineer

12/2011 - 11/2018

Project Hosts, Inc.

- Developed a SaaS platform enabling organizations to maintain compliance with ISO 27001, FedRAMP, HIPAA, HiTRUST, and GDPR, reducing audit prep time by 30%.
- Built a network-wide monitoring application covering 120+ servers, tracking health, disk usage, and performance metrics in real-time.
- Engineered a custom monitoring suite for 200+ websites behind strict security protocols, achieving 99.9% uptime and rapid issue detection.
- Designed and deployed a network discovery and asset tracking system, improving visibility and reducing manual tracking efforts by 70%.
- Created a custom wrapper for MRTG that auto-generated configuration files from internal data sources, reducing setup time by 100% and supporting 200+ monitored endpoints.
- Automated repetitive IT tasks using VBScript, Python, and PowerShell, saving an estimated 500+ hours annually across multiple teams.

Self-Employed

- Design, develop, implement, and maintain web applications, backend services, and automation scripts.
- Conduct training sessions for end users on custom-built applications.
- Design, implement, and support complex network infrastructures.

SKILLS

- **Soft Skills:** Adaptability & Continuous Learning, Business & Product Awareness, Collaboration & Teamwork, Conflict Resolution, Decision-Making & Accountability, Emotional Intelligence & Empathy, Leadership & Mentorship, Problem-Solving & Critical Thinking, Time Management & Prioritization
- **Software Architecture & Concepts:** Agile, Batch Processing, CI/CD, Clean Architecture, Cloud Native, Domain-Driven Design (DDD), ETL/ELT, Event-Driven Architecture, Hexagonal Architecture, High Availability & Scaling, Load Balancing, Message Queues, Microservices, Profiling & Performance, Relational Database, Reverse Engineering, Scrum, Serverless, SPA
- **Cloud & DevOps:** Ansible, AWS, Azure DevOps, Azure Functions, Azure Pipelines, Azure Service Bus, Bitbucket, Digital Ocean, Docker, GCP, GitHub, GitHub Actions, GitLab, Kubernetes, MassTransit, Microsoft Azure, RabbitMQ, Terraform
- **Programming Languages:** Bash, Batch, C#, C++, CSS, HTML, Java, JavaScript, JSON, LINQ, LUA, PHP, Powershell, Python, T-SQL, TypeScript, VB.NET, VBScript, XML
- **Backend & API Development:** Alpine.js, Angular, ASP.NET Core, ASP.NET MVC, Blazor Server, Blazor WASM, Bootstrap, FastAPI, GraphQL, gRPC, IoT API, JQuery, MediatR, .NET Core, .NET Framework, .NET MAUI, Next.js, OData, React, RESTful API, SignalR, SOAP API, Vue.js, WebSocket API
- **Databases & Storage:** Apache Cassandra, CosmosDB, Dapper, EF Core LINQ-to-SQL, Entity Framework 6, InfluxDB, Microsoft Access, Microsoft SQL Server, MySQL, NoSQL, PostgreSQL, Redis, Snowflake, SQLite, Timescale
- **Networking & Security:** Auth0, DHCP, DNS, JWT, Kafka, LDAP, MQTT, MTConnect, NATS.io, OAuth 2.0, OPC UA, OWASP, RabbitMQ, SSL/TLS, TCP/IP, VPN, WireShark, WMI, Zero Trust Architecture
- **Testing & Quality Assurance:** Fuzz Testing, Integration Testing, Load & Performance, Mutation Testing, OWASP ZAP, Selenium, Testing End-to-End, Unit Testing
- **Tools & Productivity:** Azure Monitor, Bootstrap Studio, Bruno, Confluence, draw.io, Eclipse, Fiddler, Godot 4, IntelliJ IDEA, Jira, Lucidchart, Microsoft Visio, MySQL Workbench, Notion, pgAdmin, PlantUML, Postman, Putty, ReSharper, Rider, RPG Maker MZ, Site 24/7, Slack, Sourcetree, SSMS, Swagger, Trello, Unity, Visual Studio, VS Code

EDUCATION**IT - Focus Programming**

American InterContinental University

01/2008 - 12/2010

Computer Science

Tusculum University

01/2006 - 12/2008
